

# Information Security & Governance

**Kraft Kennedy**

(800) 523-3081  
info@kraftkennedy.com

**You are a trusted advisor to your clients.**

**Can they trust your security to protect their valuable information?**

Data breaches pose serious financial and reputational risks to your firms. Cyber-attacks are becoming increasingly common while regulations for data governance are becoming stricter. Kraft Kennedy has the expertise to help you manage your security, policies, and IT environment with the right technology and processes.

<b>Security Assessment</b>	<b>Security Program/Policy</b>
<p>Kraft Kennedy will work with you to analyze your environment, understand your security posture, and provide the insight needed to make informed decisions to improve your security. Our team of security experts will help you define goals for your information security program and help you achieve them with a risk assessment, an audit of security controls, or full vulnerability and penetration testing.</p>	<p>Plan, implement, and manage your organization's information security program, including the policies that guide both your internal and client-facing activities. Whether you need security awareness training for your staff, a review of an email security policy, or are just getting started with a program, we will work with you to organize your efforts, align your plan with the business needs of your firm, and provide you with the resources to measure and monitor the program's success.</p>
<b>Security Architecture Design</b>	<b>Digital Forensics/Incident Response</b>
<p>From the data center to the desktop, Kraft Kennedy's team of information security professionals will help you design and implement your infrastructure in a way that enables you to effectively mitigate risks now and in the future while maximizing your return on investment.</p>	<p>Kraft Kennedy's certified digital forensic and incident response professionals use proven technology and procedures to accurately identify incidents, preserve evidence, forensically investigate the data, and remediate problems. Our experts have been qualified to testify in state and federal court and follow industry best recognized practices.</p>
